Important Communication :

We would like to inform you that the Government of India has mandated the possession of a BIS (Bureau of Indian Standards) certificate for certain materials. If the materials supplied by you fall under this requirement and your firm is not BIS registered, we regret to inform you that TSL will not be able to procure from you going forward. To ensure that our long-term strategic partnership continues seamlessly, we kindly encourage you to obtain the necessary BIS registration at your earliest convenience.

Warranty/Guarantee period:

1. Unless indicated otherwise, warranty/guarantee period shall be twelve (12) months from the date of commissioning/use or eighteen (18) months from the date of receipt of Goods, whichever is earlier. However, for any "Generic defects" i.e. any defect that is not discoverable by reasonable or customary inspection arising out of a defect in design, materials, workmanship, or other reasons Supplier will be responsible even after warranty/guarantee period.

2. During the warranty/guarantee period, the Supplier shall, at his own expense, upon written demand by the Purchaser, promptly repair or replace the defective Goods or any part(s) thereof at the plant site, free of cost:

i. Which may not comply with Technical Specifications and the representations and warranties set forth in this General Conditions of Contract, or

ii. Which may be of defective or incorrect design, or

iii. Which under normal and proper use and maintenance proves defective in workmanship or materials or deficient in performance, subject to normal wear and tear.

Packaging Standard

1. Material in loose, gunny bag, jute bags etc are not allowed to supply.

2. For material weighing less than 20 KG and having total no. of packets less than 25, carton box packing to be done. If no. of packets is more than 25, pallet packaging to be done ensuring mechanised handling. Dimension of pallet should not exceed 1M X 1M X 1M. Wooden pallets to be used for material weighing less than 20 KG weight with more than 25 packets.

3. Material weighing more than 20 KG, palletized box packing is required, which will ensure mechanised handling. Metallic pallets (ideally IS 2062:1999-GR:A.) or recyclable polypropylene pallets (ideally weighing more than 20 KG pallets).

4. Suitability for stacking:

Loading units must be put together so that they can be handled, transported, stacked, and stored as a unit. If loading units are made up of smaller containers/ boxes, then they must be organised properly to match and properly fit into pallets# standard dimensions. More than two different materials should not be packed together.

If two different materials are packed together, care should be taken that they should not get mixed. They may be placed next to one another, separated by intermediate layers (never on top of one another) to form a loading unit. Care must be taken that similar items are packed in the same loading unit, to avoid mistakes.

5. Securing Loads:

Packaging should always be selected so that it can be properly secured and remain stable during transportation/shifting. Goods can be secured using shrink covers, strapping and stretch film.

Edge protection strips must be used to prevent strapping from cutting into the cardboard. Pallet collars must be used to prevent stacked loads from slipping. The sender is responsible for ensuring the flawless technical state of the pallet collars.

When removing only part of a loading unit, it must be ensured that the remaining items are stable. To ensure that handling is possible using floor-level conveyors and automatic conveying equipment, there must be enough clearance between the pallet's runners.

6. Pipe Packaging:

The pipe bundle diameter should not exceed 0.8 Mtr (max.). Try to give a hexagonal shape of pipe bundle. Bundles should be properly strapped minimum 4 places; overall weight of bundle should not exceed more than 1 MT. Strapping load bearing capacity should be min 2 MT. Wooden dunnage to be provided at min 3 places at floor of truck/trailer for stable movement and mechanised loading /unloading.

All consignments should come in trailers with correct dunnage. No #Punjab Dala# and truck is allowed inside the TSL works.

7. Levelling & Marking:

a. UMC # with description, Qty with UoM & Part # (if applicable), Use best before date (if applicable) to be marked on each individual items.

b. UMC#, Part#, Qty with UoM on Box.

c. Vendor Detail (Code & Name)

d. PO# and Date

e. ECCI # and Date

f. Test Certificate & MSDS if applicable

g. RFID (Wherever possible) of material no.

h. Special handling precaution if applicable
